ARGUMENTS FOR PRE-APPEAL BRIEF REQUEST FOR REVIEW

Hon. Commissioner  
of Patents and Trademarks  
Alexandria, VA 22313-1450

Dear Sir:

In response to the office action dated June 13, 2006, the applicant requests review of the legal and factual basis of the final rejection in the above-identified patent application. This review being requested because of clear errors in the examiner's rejections and the examiner's omission of essential elements need for a prima facie rejection. This request is accompanied by a Notice of Appeal submitted concurrently herewith.

**Serial No.** : 09/752,476  
**Filed** : January 2, 2001

REMARKS

Claims 17-29 are pending where Claim 17 is independent. In the final office action, the examiner rejected all of the claims on the basis of the identical rejections as in the previous office actions dated June 24, 2005 and December 22, 2005. The most recent listing of claims is provided in the applicant's response dated March 21, 2006.

In response to the office action dated October 19, 2004, the applicant has added the feature "the steps of displaying and selecting main systems and sub-systems can be repeated in a back and forth manner" to Claim 17 and explained the difference of this feature from the cited references at page 11 in the response dated March 21, 2005. Notwithstanding this response, the office action dated June 24, 2005 repeats the previous rejection with no substantive changes in the explanation of the rejection. The examiner failed to show any prima facie evidence that supports the rejection under 35 U.S.C. 103(a). In fact, none of the cited references show distinction between the main system screen and the sub-system screen let alone switching between the two.

In response to the office action dated June 24, 2005, the applicant has added the feature "images of two or more different main systems and two or more different sub-systems are displayed during the steps" to Claim 17 and explained the difference from the prior art at pages 7 and 8 in the response dated August 24, 2005. Notwithstanding this response, the office action dated December 22,

Serial No. : 09/752,476  
Filed : January 2, 2001

2005 repeats the previous rejection with no substantive changes in the explanation of the rejection. The examiner ignored this newly added feature to Claim 17. The examiner failed to show any prima facie evidence that supports the rejection under 35 U.S.C. 103(a). In fact, none of the cited references show distinction between the main system screen and the sub-system screen let alone the images of two or more different main systems and different sub-systems.

In response to the office action dated December 22, 2005, the applicant has added the feature "information as to whether a special kit is required or not for a particular component is displayed based on the fitment with the customer's vehicle" and another feature "notifying the customer when a combination of components resulted from a selection of component made by the user is incurable" to Claim 17 in the response dated March 21, 2006. The applicant has explained the difference of this feature from the prior art at pages 7-9 in the response. Notwithstanding this response, the office action dated June 13, 2006 repeats the previous rejection with no substantive changes in the explanation of the rejection. The examiner ignored the newly added features to Claim 17. The examiner failed to show any prima facie evidence that support the rejection under 35 U.S.C. 103(a). None of the cited references show the idea of providing the information as to whether a special kit is required. None of the cited references show the idea of notifying the customer when a combination of

Serial No. : 09/752,476  
Filed : January 2, 2001

components resulted from a selection of component made by the user is incurable.

In conclusion, in view of the arguments presented in the responses dated March 21, 2005, August 24, 2005 and March 21, 2006, and the supplemental arguments presented herein, the applicant submits that the office actions fails to set forth prima facie rejections for the claims of the present invention. Accordingly, the applicant respectfully request a finding that the application is allowed on the existing claims.

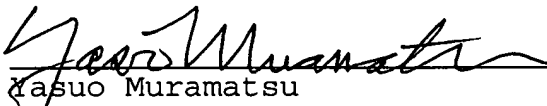

Respectfully submitted,

MURAMATSU & ASSOCIATES
